

Course Name	Digital production: modeling and optimization
Major	Computer Software, Electronic Information Science and Technology, Electrical Engineering
Objective	To make the students master the method of implementation, online balance, simulation processes, and other areas of digital production. To improve students' understanding of the production process, production system analysis and the comprehensive management ability.
Semester	5 th
Language	English
Learning/Teaching methods	Course teaching, demonstration and exercises
Hour	48h
Credit	3.0
Prerequisite	Advanced mathematics, DSP, Digital electronic technique, C language
Content	<ol style="list-style-type: none"> 1. Implementation analysis (6h) 2. The balance method (8h) 3. Simulated the process of the production system 4. Design the implementation and simulation of an actual project
Grade/Exam	exam 70%+performance in class(homework+ experiment)30%
